# I. As drawn, and the shade traced

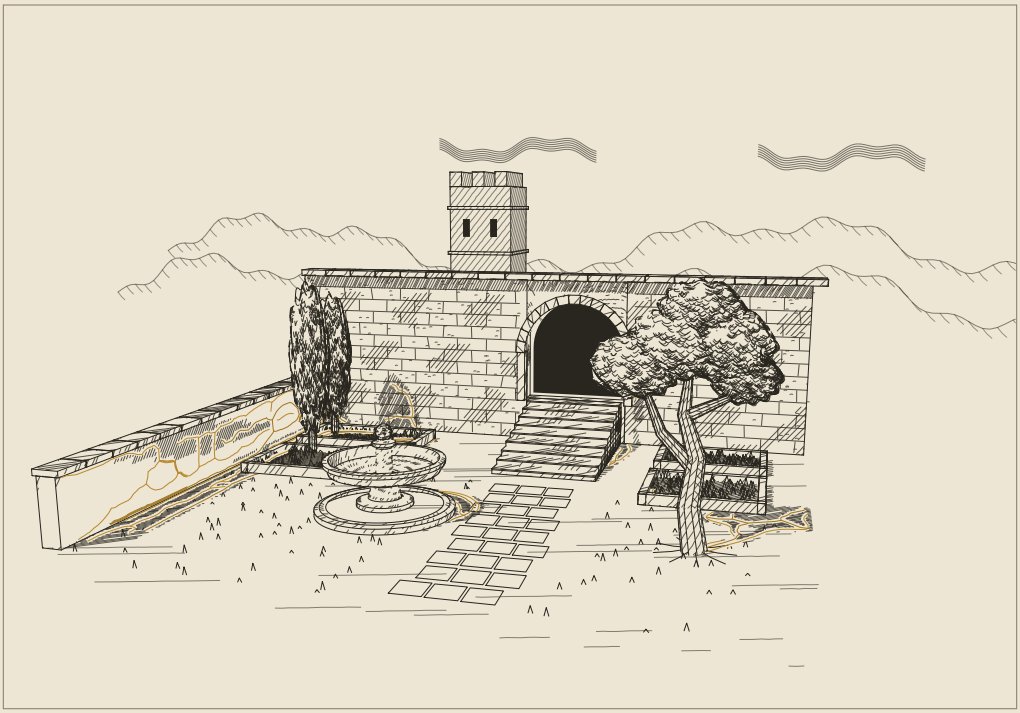

Sol's plate: faces shaded by angle to the sun, three hand-placed shadow fans.

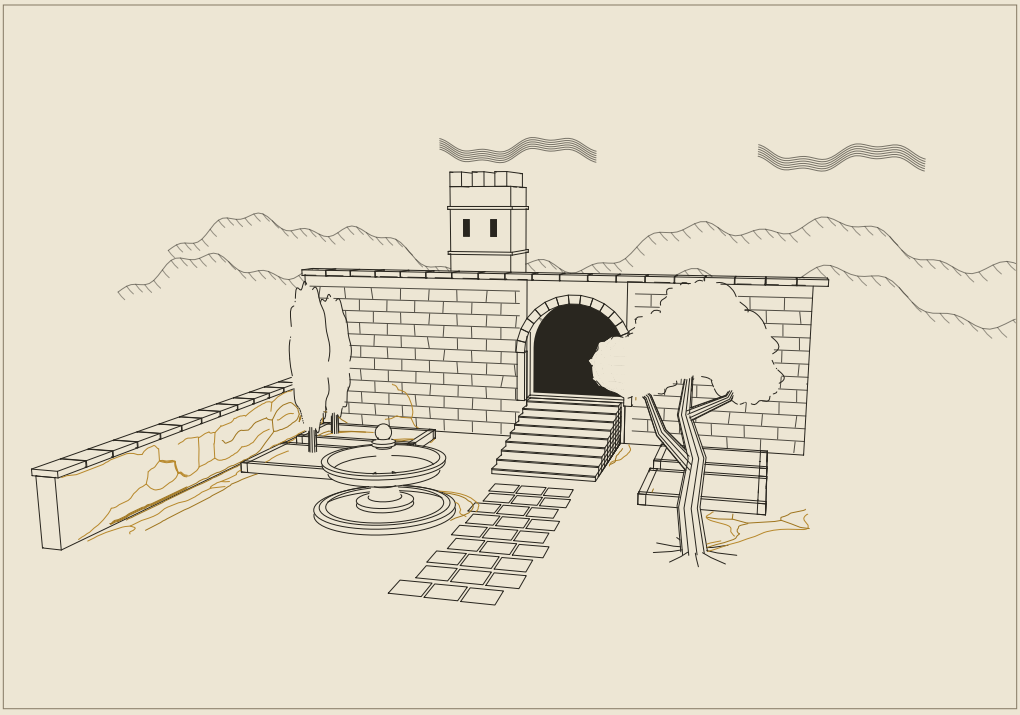

The fans replaced by cast shadow traced from the same sun.

# II. The mould in the shade

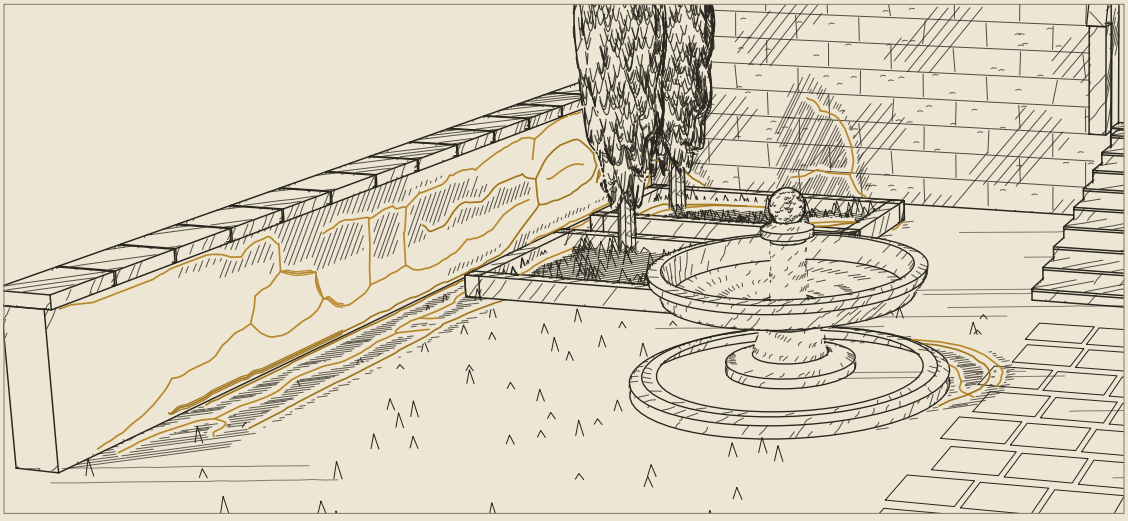

Two strains in the traced shade; paper reserved around the veins.

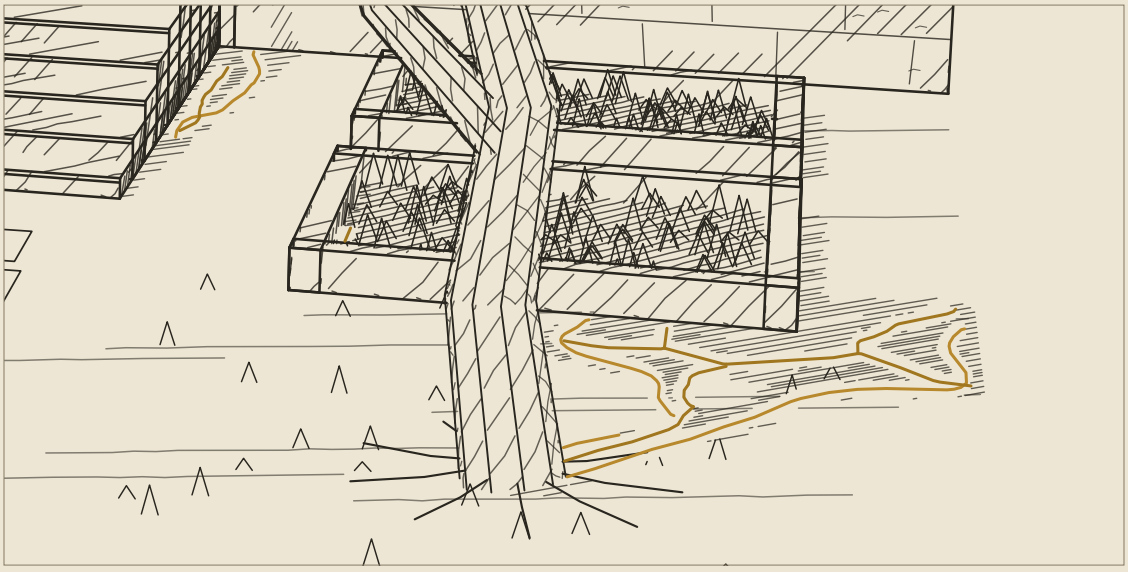

The mould alone.

# III. The shade, closer

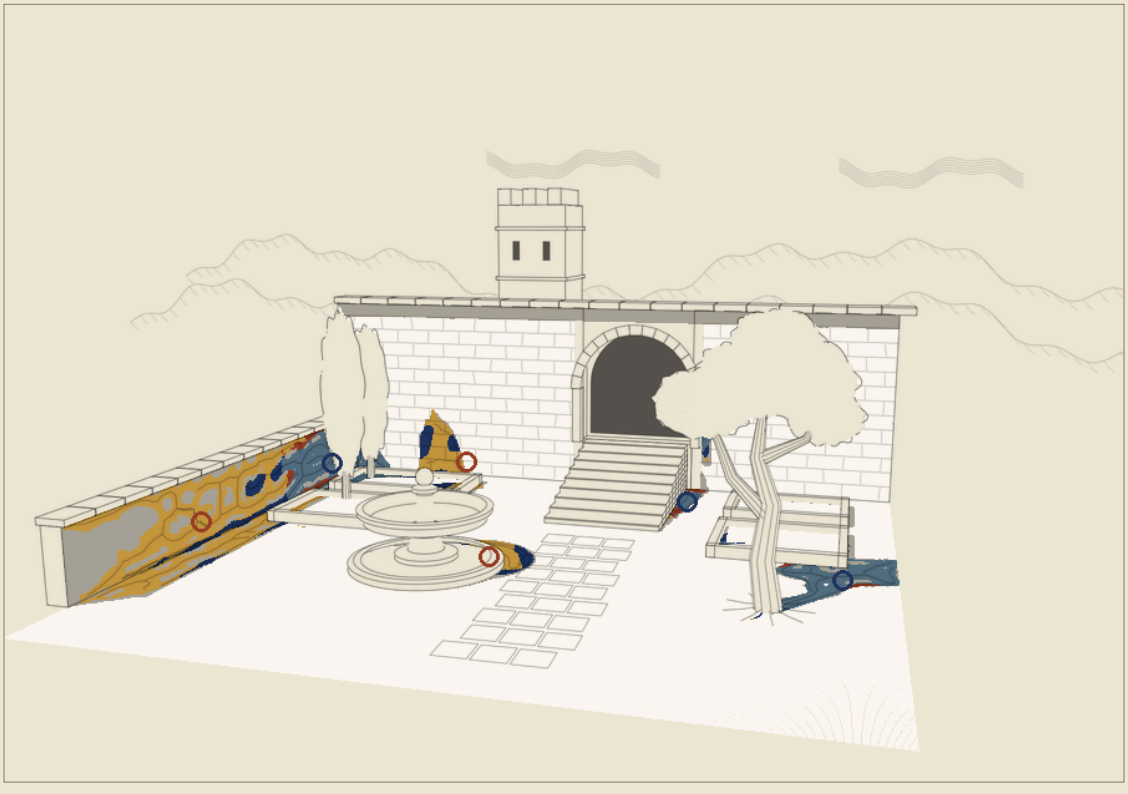

The left wall and the fountain: strain A from the near wall, strain B from the far.

The tree's shadow and the bed beside it.

# Who holds the shade

- lit: the light over the ambient
- shade, unoccupied
- strain A, on its own ground
- strain A, ground taken from B
- strain B, on its own ground
- strain B, ground taken from A

rings: inoculation sites (red A, blue B)

trail on lit ground: 2.7%
occupied ground that changed strain: 16.1%
veins drawn: 90; hatch marks cut: 501
ink near the mould: 0.154 before, 0.158 after
traced-shadow hatch held around the cut; Sol's marks only cut
Sol's shadow fans removed: 138; traced-shadow marks: 636

per surface: lit share / changed strain / trail on lit
ground: 86% / 16.9% / 3.9%
rear wall: 83% / 17.3% / 1.7%
left wall: 0% / 11.0% / 0.0%
bed 1: 86% / 0.9% / 7.5%
bed 2: 55% / 31.4% / 6.9%
bed 3: 94% / 27.1% / 47.4%
bed 4: 93% / 0.0% / 0.0%

# I. Ink by screen spacing

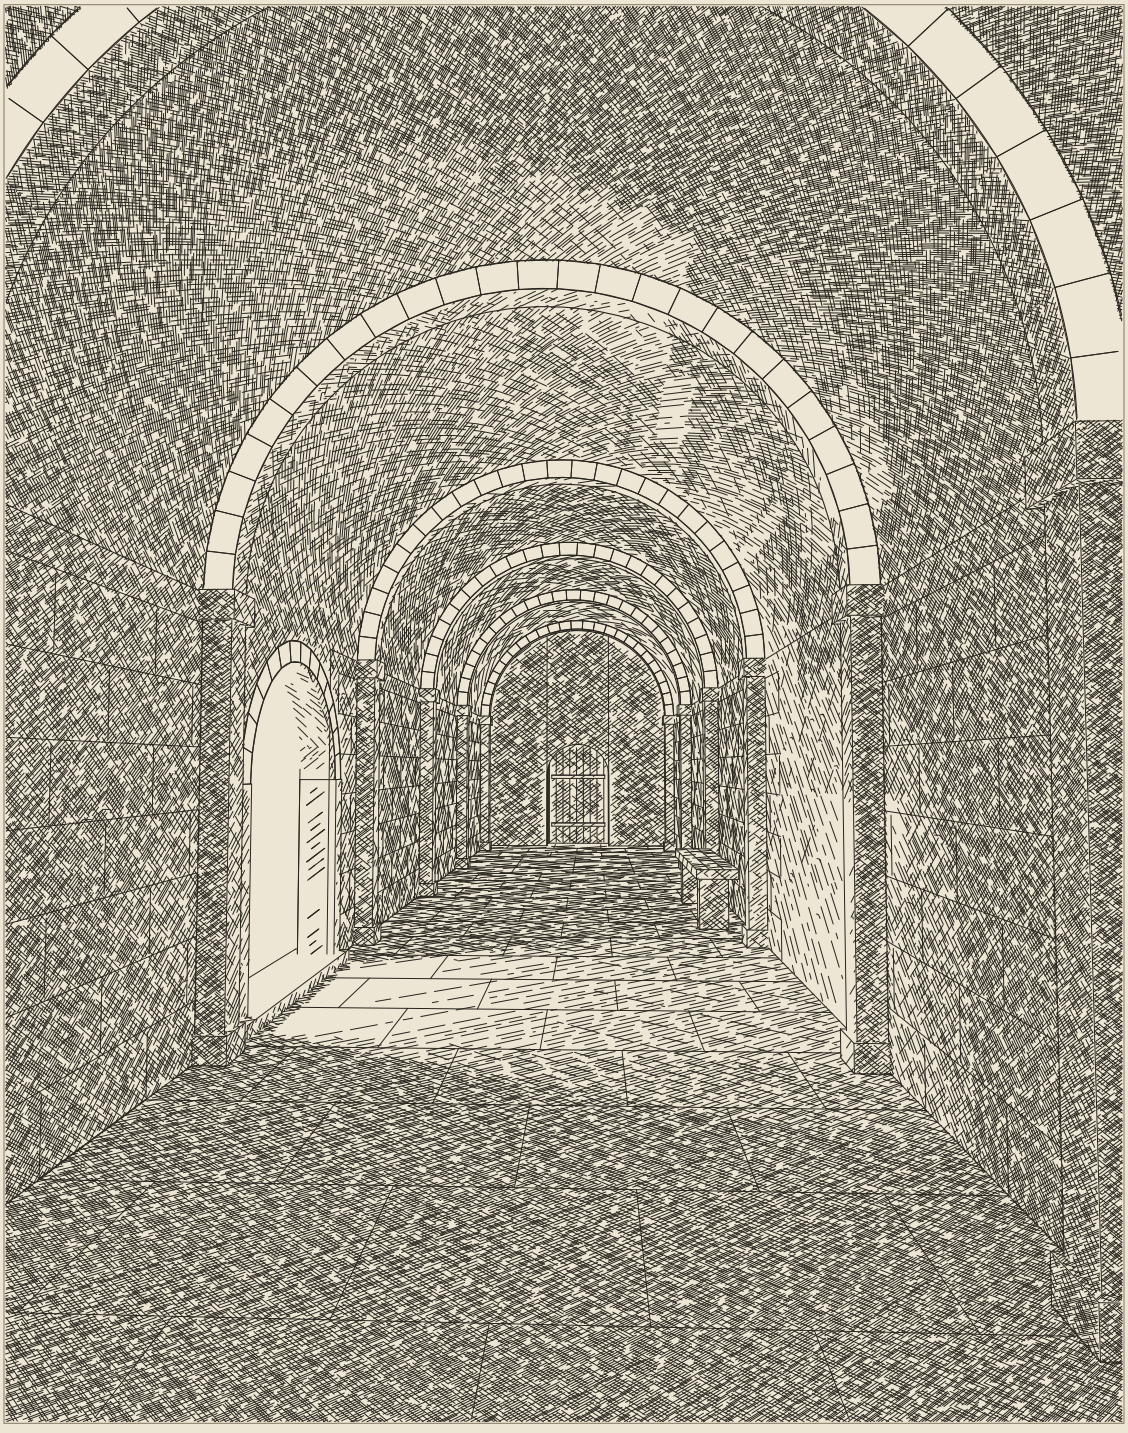

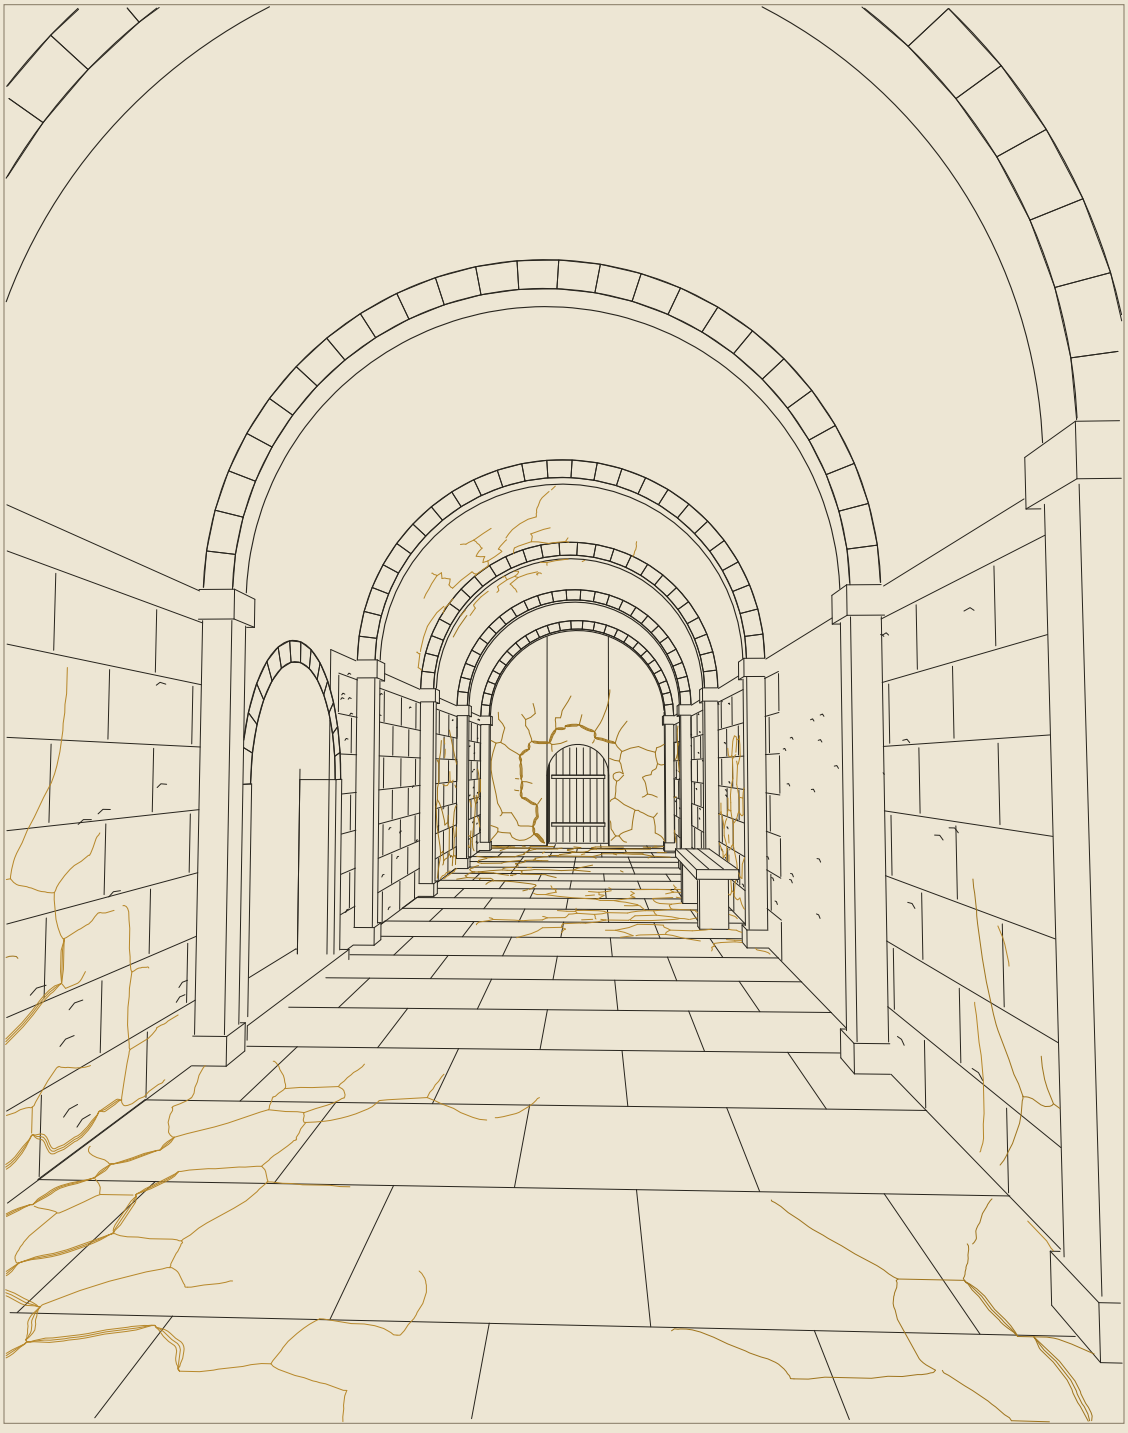

Plate II of the previous package: the base the mould is cut into.

# II. The mould in the shadow

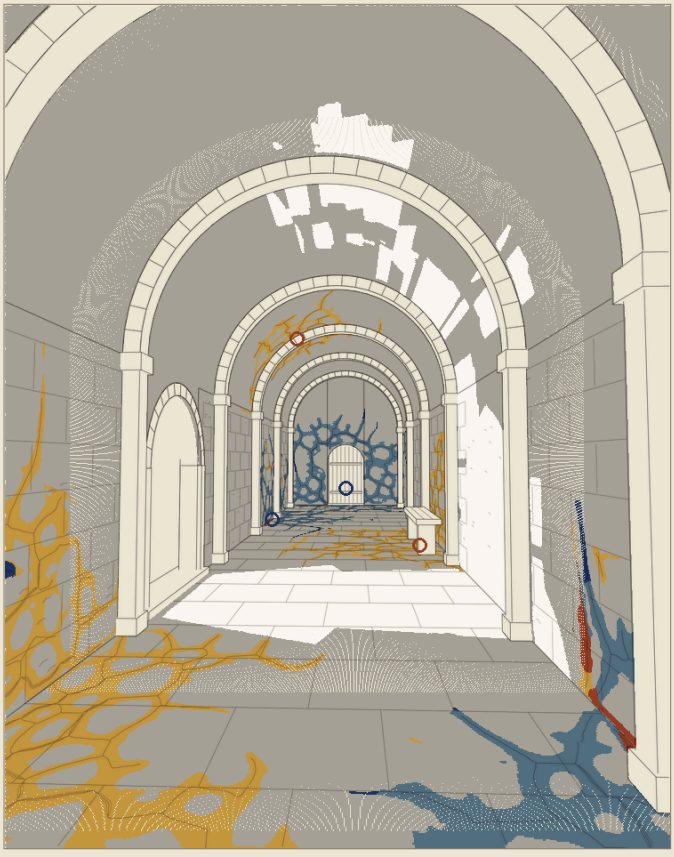

Two strains; the doorway's light repels them. Hatching held around the white line.

# III. The mould alone

Structure and veins only.

# Who holds the shade

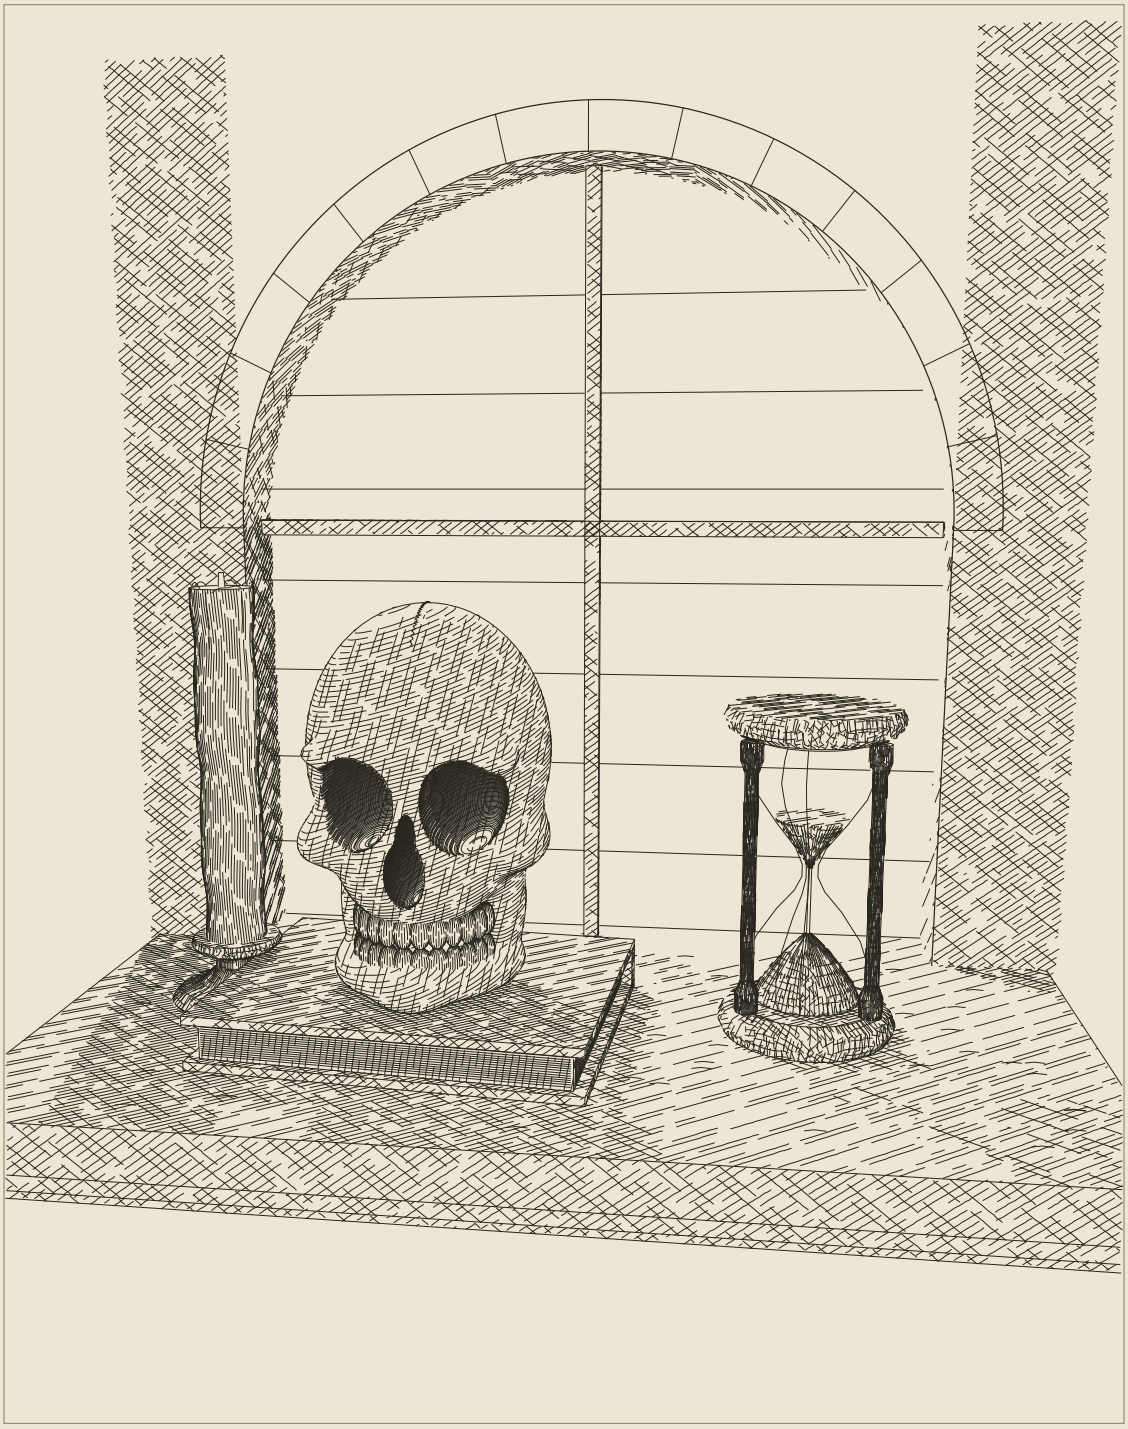

lit: the light over the ambient
shade, unoccupied
strain A, on its own ground
strain A, ground taken from B
strain B, on its own ground
strain B, ground taken from A

rings: inoculation sites (red A, blue B)

trail on lit ground: <0.1%
occupied ground that changed strain: 5.4%
veins drawn: 614; hatch marks cut: 2922
ink near the mould: 0.318 before, 0.311 after
hatching re-allocated to hold the tone around the cut

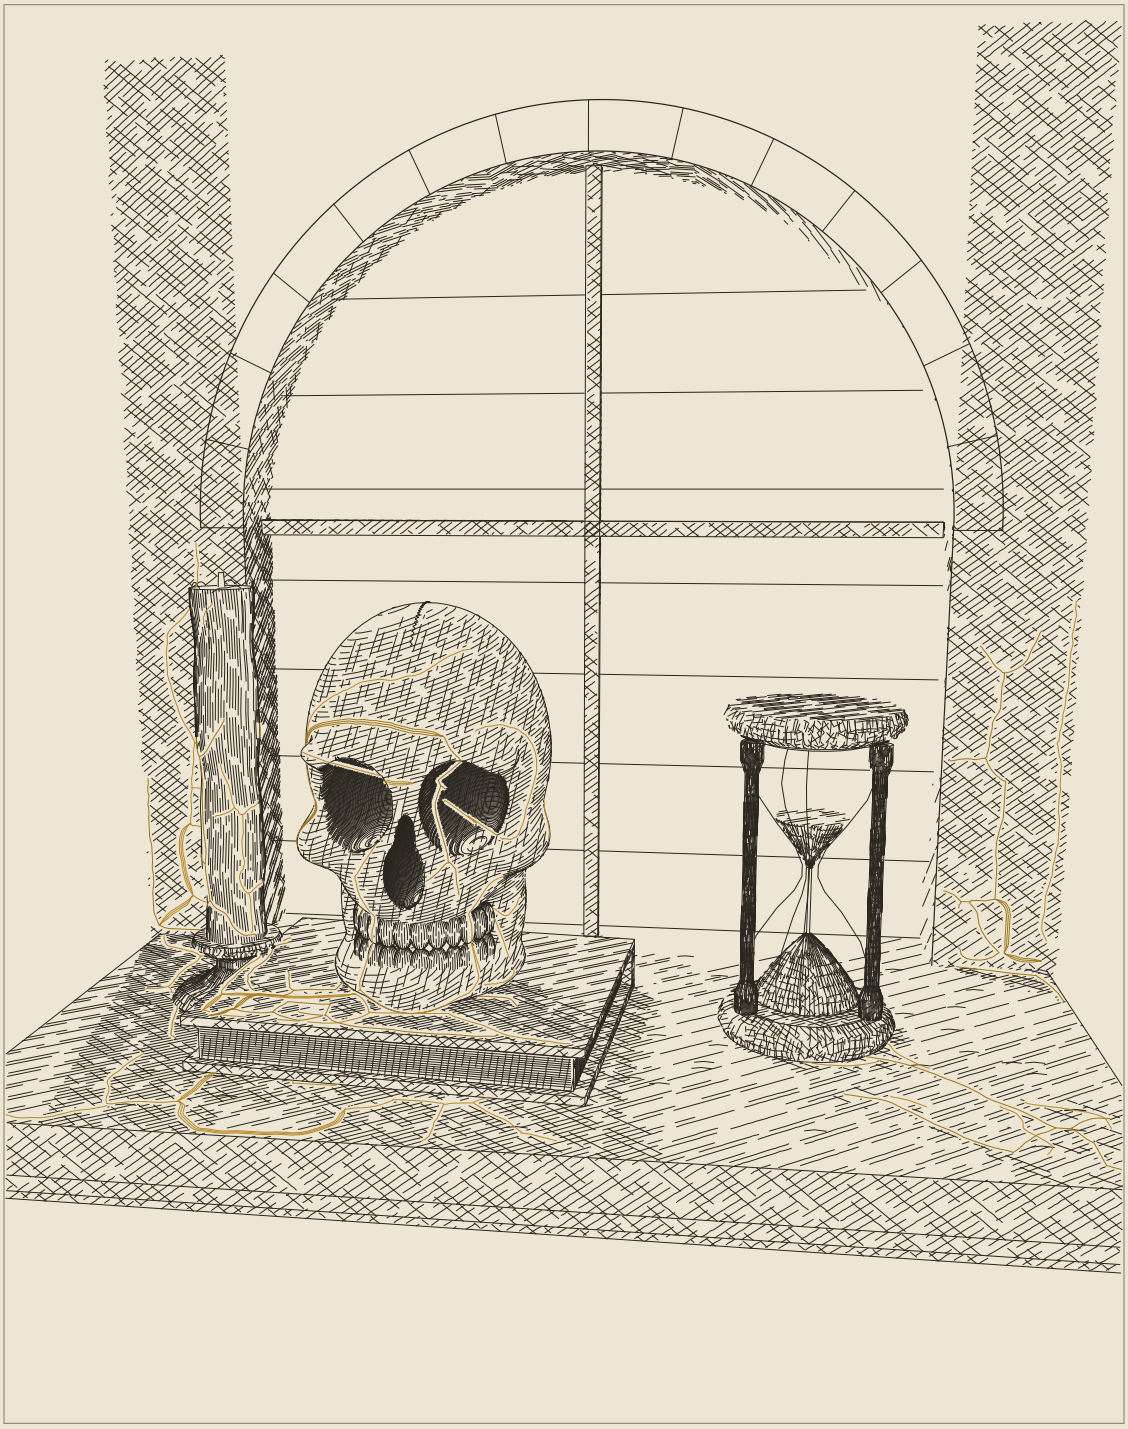

per surface: lit share / changed strain / trail on lit
floor: 15% / 5.1% / <0.1%
wall_left: 0% / 6.1% / <0.1%
wall_right: 17% / 7.9% / 0.2%
vault: 5% / 0.9% / <0.1%
rear_wall: 0% / 4.7% / 0.0%

# I. Light through the casement

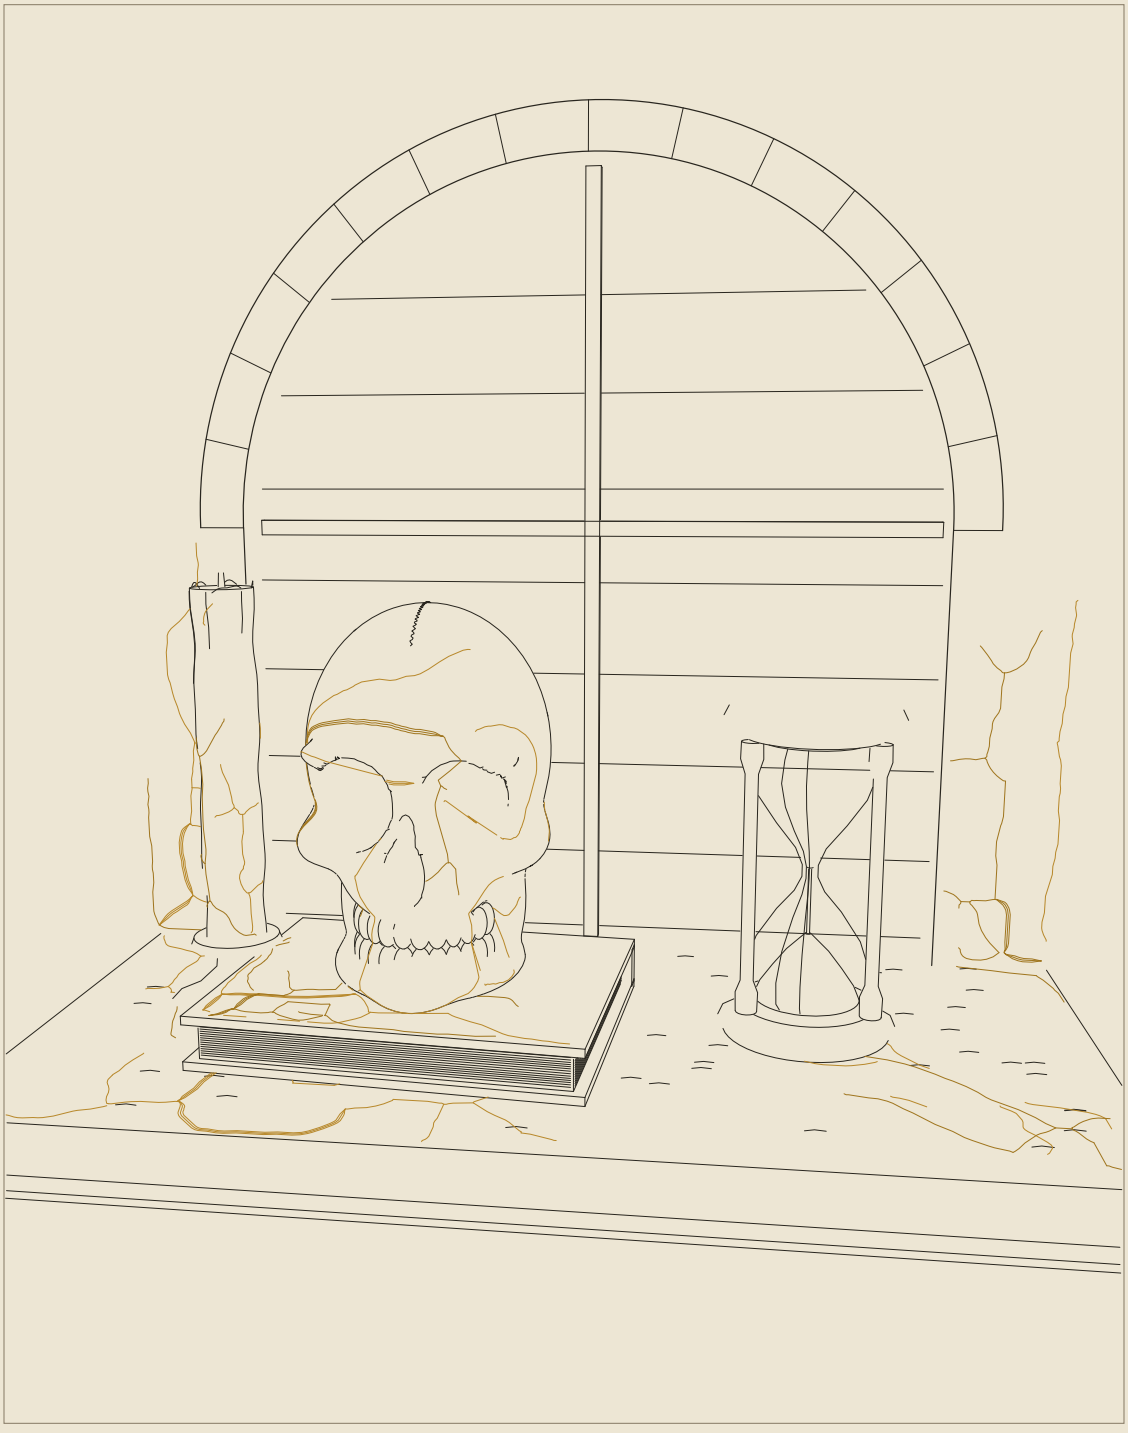

Sol's plate II, reproduced exactly: the base the mould is cut into.

# II. The mould in the shadow

Two strains from the orbits, the jambs and the sill; Sol's marks only cut.

# III. The mould alone

Structure and veins only.

# Who holds the shade

- lit: the light over the ambient
- shade, unoccupied
- strain A, on its own ground
- strain A, ground taken from B
- strain B, on its own ground
- strain B, ground taken from A

rings: inoculation sites (red A, blue B)

trail on lit ground: 3.2%
occupied ground that changed strain: 15.1%
veins drawn: 157; hatch marks cut: 1187
ink near the mould: 0.193 before, 0.168 after
Sol's threshold steps kept: the white line lifts the ink near the mould

per surface: lit share / changed strain / trail on lit
sill top: 50% / 10.0% / 5.2%
wall: 0% / 18.8% / 0.0%
book cover: 64% / 23.9% / 8.6%
skull: 20% / 22.9% / 0.6%
candle: 34% / 10.9% / 0.6%
